

ABOUT ME

Final year computer engineering student. Interested in server side development and building web applications. A quick learner and a good team player.

WHAT I KNOW

Python	Java
HTML / CSS	MySQL
MS Office	Teamwork

SCHOOLING

B.E. Computer Engineering

Gujarat Technological
University
2022 - 2026

LANGUAGES

English	
Hindi	
Gujarati	

TOOLS I USE

- Visual Studio Code
- GitHub
- Postman
- Figma

SOFT SKILLS

- Communication
- Problem solving
- Time management

INTERESTS

Cricket, reading, photography, open source

WHERE I WORKED

Software Development Intern

Zenlabs Technologies, Ahmedabad

Jan 2025 - Jun 2025

- Worked on backend APIs for the internal dashboard.
- Helped the team with database related work and queries.
- Fixed bugs that were reported by the testing team.
- Attended daily standup meetings and sprint planning.

THINGS I BUILT

Inventory Management System

A web application to manage stock for small shops. Used Python for the backend and MySQL to store all the product data.

College Event Portal

Website where students can browse and register for college events. Made using HTML, CSS and Java on the server side.

Weather Application

A small application that shows the weather of any city by calling an online weather service.

EXTRA LEARNING

Full Stack Web Development

2024

Online course

Completed a course covering web development basics and made a few practice websites.

Database Management Workshop

2024

College workshop

Two day workshop on database concepts and writing queries.

OTHER

- Participated in the college technical festival.
- Active volunteer at the campus coding club.
- Certificate of participation in inter-college hackathon.
- Member of the university sports committee.
